APPENDIX A

GLOSSARY

FIRST-TIME FIRST-PROFESSIONAL STUDENT--A student enrolled for the first time in a professional school or program which requires at least two academic years of college work for entrance and a total of at least six years for a degree.

FIRST-TIME FRESHMAN--An entering freshman who has not previously attended ANY college. Also included are those students who entered with advanced standing (college credits earned before graduation from high school) at the freshman level and those who attended college for the first time during the summer of 1984. Identified separately are those students who graduated from high school during the 1983-84 academic year and all other first-time freshmen. All other first-time freshmen are entering freshmen who have not previously attended any college and who are not 1983-84 academic year high school graduates.

FIRST-TIME GRADUATE STUDENT--An entering student who holds a bachelor's or first-professional degree, or equivalent, and is working toward a master's or doctor's degree.

FIRST-TIME STUDENT--A student enrolled at an institution for the first time at any of the following levels - undergraduate, graduate, first-professional, or unclassified.

FIRST-TIME UNCLASSIFIED STUDENT--An entering student who is not a candidate for a degree or other formal award, although taking courses for credit in regular classes with other students and who had attended college prior to this fall. This category includes students who cannot be classified by academic level, as well as students who already have degrees but who are taking additional courses at the same level or lower. It also applies to students with degrees below the baccalaureate at two-year institutions.

FIRST-TIME UNDERGRADUATE--A student enrolled for the first time in a four- or five-year bachelor's degree program, in an associate degree program, or in a vocational or technical program that is normally terminal and results in formal recognition below the baccalaureate.

FIRST-TIME UNDERGRADUATE TRANSFER STUDENT--An entering undergraduate student who has attended another college and has not received a baccalaureate degree. They may be transferring with or without credit.

FOREIGN STUDENT--A person who is not a citizen of the United States and who is in this country on a temporary basis and does not have the right to remain indefinitely. In other surveys this person is classified as a non-resident alien.

HOME STATE--The State in which a student was residing when first admitted to an institution at the current student level.

1/ Average tuitions were not calculated for the specialized associate degree-granting institutions or listed for the state school of technology because of the uniqueness of charges in relation to the length of programs.
2/ Averages were based on main campus tuition and required fees.

NOTE: (1) Tuition and required fees reported on a credit-hour or per course cost were not used in calculating average charges.
(2) Average community college charges are for in-state students residing in sponsoring areas only. Tuition for in-state students residing in nonsponsoring areas is approximately twice the listed tuition for in-state students.

For each of the past two academic years, average in-state undergraduate tuition and required fees increased by less than 10.0 percent for each institutional category. Specifically, the 1985-86 increase over 1984-85 at public institutions was: 2.8 percent at the state universities; 7.5 percent at the state-related commonwealth universities; and 6.6 percent at the community colleges. Likewise, the rate of increase at private institutions was: 8.2 percent at the private state-aided institutions; 9.3 percent at the private colleges and universities; 0.0 percent at the theological seminaries; and 8.0 percent at the private junior colleges.

It should be noted that apparent decreases for certain years were actually caused by the addition of institutions with lower than average tuitions, the removal of institutions that closed which had higher than average tuitions, or adjustments by institutions in their method of reporting.

1/ Average room and board charges were not calculated for the specialized associate degree-granting institutions or listed for the state school of technology because of the uniqueness of charges in relation to the length of programs.
2/ Averages do not include charges for room and board at branch campuses.

The average combined room and board charges listed above include data for those institutions which reported charges for both room and board. As with in-state undergraduate tuition and required fees, average combined room and board charges increased by less than 10.0 percent for each of the past several years. By institutional category, the 1985-86 increase compared to the 1984-85 increase was: 8.7 percent versus 4.6 percent at the state universities; 5.0 percent versus 4.9 percent at the state-related commonwealth universities; 7.7 percent versus 0.8 percent at the private state-aided institutions; 7.4 percent versus 6.8 percent at the private colleges and universities; 6.1 percent versus 9.1 percent at the theological seminaries; and 5.7 percent versus 4.5 percent at the private junior colleges.

As a note, the community colleges are not listed here since room and board charges are not applicable.

1/ Average tuitions were not calculated for the specialized associate degree-granting institutions because of the uniqueness of charges in relation to the length of programs.

2/ Tuition and required fees for out-of-state students were listed only when they differed from the charges for in-state students.

3/ Averages were based on main campus tuition and required fees except at the first-professional level where charges for the Milton S. Hershey Medical Center were included.

Note: (1) Tuition and required fees reported on a credit-hour or per course cost were not used in calculating the average charges.

(2) Average community college charges are for in-state students residing in sponsoring areas only. Tuition for in-state students residing in nonsponsoring areas is approximately twice the listed tuition for in-state students.

INTRODUCTION

"Public School Professional Personnel, 1985-86" is one in a series of publications containing statistical summaries related to basic education, higher education, and vocational education in Pennsylvania. The data contained in this publication reflects current year figures as well as trends on a variety of selected topics. In many instances, more detailed data is available.

This report contains data on salaried personnel only. Data for employes paid on a per diem basis, interns, and exchange teachers, to cite a few examples, is not included. The reader should keep in mind that information presented by position or assignment deals with people rather than positions. If an employe worked in more than one position or assignment, the person was counted only in the position or assignment in which a majority of his or her time was spent. In cases where the time was divided equally between two or more assignments, the chief school administrator selected one assignment. The data includes only personnel employed on a full-time basis in the schools.

Because of reporting difficulties and because salary contracts had not been settled at the time the reports were submitted, 1984-85 salaries or salaries with mandated increments were reported for all or a portion of the employes in the school districts of Austin Area, Bangor Area, Blue Mountain, Blairsville-Saltsburg, Bradford Area, Burgettstown Area, Corry Area, Eastern York, Fleetwood Area, Forest Hills, Girard, Greensburg Salem, Lackawanna Trail, Lower Merion, Meyersdale Area, Northern Tioga, Peters Township, Ringgold, South Park, Southwest Butler County, Western Beaver County, West Middlesex Area, and the area vocational-technical schools of Butler County, Center County, Clarion County, Somerset County, and Warren County.

In analyzing the data relative to level of education, it must be noted that the figures are not synonymous with years of higher education, but are codes used in the project. However, these averages can be used for comparative purposes. The codes upon which the averages are based are as follows:

1 No college
2 One year of college
3 Two years of college
4 Three years of college
5 Bachelor's degree
6 Master's degree
7 Master's degree plus 30 graduate credits
8 Master's degree plus 60 graduate credits
9 Doctor's degree

The Professional Personnel Record includes professional positions not recognized as such by the Department of Education or in the "School Laws of Pennsylvania." They are included as they do exist in certain administrative units. However, their inclusion here does not constitute official recognition as professional positions by the Department of Education.

Requests for more detailed data and questions or comments about the data should be addressed to the Department of Education, Division of Data Services, 333 Market Street, Harrisburg, PA 17126-0333 (Phone 717-787-2644).

The 118,239 full-time personnel employed in professional positions in the public schools of Pennsylvania at the beginning of the 1985-86 school year was a 0.5 percent decrease from the 118,782 employed last year, and a 10.8 percent decrease from the 132,588 employed nine years ago.

During this 10-year period, the classroom teachers group showed the greatest loss with an 11.2 percent decrease. However, there was a slight increase in classroom teachers in 1985-86, the first annual increase in six years. The administrative/supervisory group showed a loss of 3.0 percent since 1976-77.

Classroom teachers accounted for 86.0 percent of the total number of 118,239 in 1985-86; coordinate services personnel accounted for 8.1 percent; administrative/supervisory, 5.3 percent; and the position classifications of 0.6 percent were unknown. These percents changed very little over recent years as evidenced by the fact that the 86.0 percent for classroom teachers was only a 0.3 percent difference from the 86.3 percent figure nine years earlier.

HIGHLIGHTS

- In 1984-85, there were 197,996 students enrolled in secondary vocational education programs in Pennsylvania. This was a decline of 63,366 enrollees or 24.2 percent from the peak of 261,362 in 1978-79. During that same six year period, total public secondary enrollments in grades 10 through 12 dropped 18.7 percent.

- In 1984-85, 364,092 students were enrolled in vocational education programs. These included 197,996 at the secondary level; 93,133 at the postsecondary level (includes only the community colleges, The Pennsylvania State University, and 59 other institutions); and 72,963 at the adult level in secondary schools.

- Females accounted for 52.2 percent of the total vocational education enrollments.

- Minorities represented more than 14 percent of all students enrolled in vocational education.

- Approximately 62 percent of all secondary level vocational education students attended a vocational education program operated by a high school, while another 36 percent attended a vocational education program operated by an area vocational-technical school (AVTS); the remaining 2 percent attended a program operated by either an intermediate unit or a correctional institution.

- Secondary vocational education served 18,425 handicapped, 57,355 disadvantaged, and 1,596 limited English proficiency students in 1984-85.

- Responses from the follow-up survey of the 74,709 vocational education completers in 1983-84 indicated that close to 86 percent were gainfully placed (employed, military service, or pursuing additional education).

- Over $434 million were expended in support of vocational education programs in 1984-85.

Pennsylvania's total vocational education enrollments for 1984-85 were 364,092. This represented a drop of 9,855 students (2.6 percent) from the 1983-84 figure, and a 17.9 percent decline from the high of 443,220 students reported in 1978-79.

In 1984-85, 48.0 percent (37.1 percent in occupational programs; 10.9 percent in consumer and homemaking programs) of all public secondary students in grades 10 through 12 participated in a vocational education program.

Postsecondary and adult definitions have changed over the years making attempts at comparison misleading.

A new program coding system entitled "A Classification of Instructional Programs" (CIP) was developed at the national level and was implemented in Pennsylvania in 1982-83. As a result of this new coding system, some programs are now included in different program fields. Several programs that were in trade and industrial education prior to 1982-83 are now in occupational home economics education or not elsewhere classified.

Females account for 52.2 percent of the total vocational education enrollment and 48.2 percent of the occupational enrollment. Although sex equity efforts have contributed to an increase in females and males in nontraditional areas, the overall enrollment picture is still aligned according to the traditional female/male roles.

1/ Does not include enrollments in correctional institutions.

Of the 197,615 students (excluding 381 in correctional institutions) being served by vocational education at the secondary level, 9.3 percent are handicapped, 29.0 percent are disadvantaged, and 0.8 percent have limited English proficiency. There is some overlap in these three percentages since a student may be reported in more than one special needs area.

Special needs students may be enrolled in a separate vocational education program or in a mainstream program with regular students. In 1984-85, 63.3 percent of the handicapped, 90.8 percent of the disadvantaged, and 88.1 percent of the limited English proficiency students were in a mainstream program.

[1] The sum of the program totals will not equal the program field totals since only selected programs are listed.

[2] "Total gainfully placed" includes "employed related to training," "employed not related to training," "military service," and "pursuing additional education."

[3] Less than 40 respondents.

The student follow-up of vocational education completers from the 1983-84 school year was conducted during the summer of 1985. The secondary response rate was 49.3 percent; postsecondary, 55.9 percent; adult, 51.0 percent. At the postsecondary level, a sampling plan is used; therefore, 31 of the 47 postsecondary institutions were included in this follow-up.

A student is counted in only one of the employment status categories. A student who is "pursuing additional education" and either "employed not related to training," "unemployed looking," or "unemployed not looking" is counted as "pursuing additional education." A student who is "pursuing additional education" and "employed related to training" is counted as "employed related to training"; a student who is "pursuing additional education" and "military service" is counted as "military service."

* Due to reporting inconsistencies, the 1982-83 enrollment figure as reported was too high. It is estimated that the 1982-83 nonpublic enrollment could be some 6,600 students lower with most of the difference found at the elementary level.

The overall enrollment pattern for the nonpublic schools during the past decade shows a general decline with some fluxuation occurring during recent years at the elementary level. The secondary enrollments have continued to decline.

The total nonpublic school enrollment for 1985-86 was 374,398, a decrease of 3.0 percent from the 1984-85 figure of 386,020. While there was an across the board decline in nonpublic enrollments, there is insufficient data as to the cause. Secondary enrollments dropped 3.6 percent in 1985-86 from the 107,784 pupils reported in 1984-85 to 103,857. NOTE: The students attending nonpublic schools via an intermediate unit's "Approved Private School Program," or any other publicly funded educational programming, were excluded from the nonpublic enrollments. These students have historically been counted as public school pupils.

After the negligible decrease in degrees conferred in 1983-84, the number conferred in 1984-85 exceeded each of the past ten years. Of prime importance was the strength exhibited at the associate and bachelor's levels. While the last year changes were small, the growth since 1975-76 was 6,866 associate degrees (an increase of 46.0 percent) and 2,368 bachelor's degrees (an increase of 4.3 percent). Over the 1975-76 to 1984-85 period, only master's degrees showed a decrease (down 7.6 percent). However, master's degrees increased by 205 (1.6 percent) in 1984-85 when compared to 1983-84.

As the total number of degrees has risen, the number of associate degrees has comprised an ever increasing share of the total. Although institutions of higher education are probably going through a transition period toward lower enrollments, awards at the associate level should maintain or continue to increase their percentage of the total awards.

1/ Includes the major fields of "engineering" and "engineering and engineering-related technologies."
2/ Includes the major fields of "allied health" and "health sciences."

The field of study structure was completely revised and became effective with the 1982-83 data. Therefore, exact comparisons with data prior to 1982-83 are not possible but certain major fields match closely.

The number of bachelor's degrees in certain major areas has changed substantially since 1975-76. In 1975-76, 15.5 percent of all bachelor's degrees were awarded in business and management. By 1984-85 that percentage had risen to 24.0. Similar comparisons show increases for computer and information sciences from 0.5 percent to 5.2 percent; for engineering from 4.9 percent to 10.3 percent; and for health professions from 5.3 percent to 7.8 percent.

Conversely, bachelor's degrees in education and the social sciences have fallen. Whereas education comprised 19.5 percent of all bachelor's degrees in 1975-76, it now accounts for only 8.2 percent. Likewise, social sciences fell from 13.9 percent to 8.9 percent of all bachelor's degrees.

1/ Racial/ethnic data has been collected biennially since 1976-77.

2/ Persons having origins in the original peoples of the Indian subcontinent were classified as White, non-Hispanic through the 1976-77 survey but are now classified as Asian or Pacific Islander.

3/ The 1974-75 survey did not list non-resident alien as a separate category.

For the 1975-76 year, there were 5,792 minorities identified as receiving an associate or higher degree which accounted for 6.5 percent of all degrees conferred. By comparison, 7,124 minority graduates comprised 7.3 percent of the 1984-85 total.

Comparing the 1984 fall enrollments from HIGHER EDUCATION SUMMER AND FALL ENROLLMENTS, 1984 with the 1984-85 degrees conferred, Black, non-Hispanic comprised 7.0 percent of the enrollments and 5.0 percent of the graduates, American Indian or Alaskan Natives comprised 0.2 percent of the enrollments and 0.1 percent of the graduates, Asian or Pacific Islanders comprised 1.4 percent of the enrollments and 1.4 percent of the graduates, Hispanics comprised 0.9 percent of the enrollments and 0.8 percent of the graduates, and White, non-Hispanics comprised 88.7 percent of the enrollments and 90.2 percent of the graduates.
